Cultural Interactions: Studies in the Relationship between the Arts

Edited by J.B. Bullen

Interdisciplinary activity is now a major feature of academic work in all fields. The traditional borders between the arts have been eroded to reveal new connections and create new links between art forms. Cultural Interactions is intended to provide a forum for this activity. It will publish monographs, edited collections and volumes of primary material on points of crossover such as those between literature and the visual arts or photography and fiction, music and theatre, sculpture and historiography. It will engage with book illustration, the manipulation of typography as an art form, or the 'double work' of poetry and painting and will offer the opportunity to broaden the field into wider and less charted areas. It will deal with modes of representation that cross the physiological boundaries of sight, hearing and touch and examine the placing of these modes within their representative cultures. It will offer an opportunity to publish on the crosscurrents of nationality and the transformations brought about by foreign art forms impinging upon others. The interface between the arts knows no boundaries of time or geography, history or theory.
